**SOFTWARE & SYSTEMS ENGINEER · WEB & MOBILE**

470-969-5812
juno880218@gmail.com
New Jersey, USA

Software and systems engineer with 6+ years of experience developing enterprise web and mobile applications, WMS solutions, and business-critical systems across warehouse, manufacturing, and retail environments. Strong background in system integration, troubleshooting, and workflow optimization. Experienced in bridging communication between end users, operations teams, and developers to translate real-world workflow needs into practical technical solutions.

## PROFESSIONAL EXPERIENCE

Jul 2022 – Present
Moonachie, NJ

### IT Application Engineer
HL CHOICE CORP (SUNSSC)

- **Warehouse automation front-end lead.** Leading web & mobile engineering for an automated warehouse migration: real-time tracking dashboards and PDA interfaces that monitor automated equipment and inventory flows
- **WMS replacement.** Primary front-end engineer replacing a legacy 3rd-party WMS with a custom, high-performance React platform built for multi-site warehouse operations
- **Data-heavy operational UX.** Built AG Grid & Syncfusion interfaces for batch editing, dynamic row allocation, and real-time validation across massive operational datasets
- **Floor-level mobile apps.** Shipped React Native and Flutter apps for 160+ warehouse staff with industrial PDA barcode SDK integration, tuned for fast inbound/outbound workflows
- **Equipment–DB integration.** Wrote optimized MS/Oracle SQL and partnered with automation/backend engineers to triage and resolve data mismatches between equipment and database systems

Jan 2022 – Jun 2022
Commerce, GA

### MES Monitoring Operator
SK C&C USA

- **Enterprise MES operations.** Monitored MES and real-time production lines 24/7, keeping production systems stable
- **Incident triage.** Resolved critical system and data interface anomalies under pressure using database tools and system logs

Oct 2019 – Nov 2021
Springfield, VA

### Software Engineer
NAU COMPUTER INC

- **Ordering & POS platforms.** Built online ordering and kiosk-based POS systems with responsive flows across desktop, tablet, and kiosk
- **Legacy modernization.** Modernized legacy codebases with reusable React components, integrated REST APIs, and improved production reliability

## SKILLS

| | |
|---|---|
| **Web** | React (Vite), TypeScript, TanStack Query, Zustand, Tailwind CSS, AG Grid, Syncfusion, REST API Integration |
| **Mobile** | React Native (iOS/Android), Flutter, React Navigation, Push Notifications, Barcode Scanner & Industrial PDA SDK |
| **Data & Infra** | MS SQL Server, Oracle SQL, Windows Server, Git, CI/CD, App Store / Google Play Console |
| **Languages** | English (Professional), Korean (Native) |

## EDUCATION

2017 – 2018 — **Northern Virginia Community College** — General Studies (Coursework), GPA 4.0 · Annandale, VA
